CSTU Telegram News Bot (v0.2)

Commands

- /addstaff
  Add a new staff member that has permission to send news. User sends staff member contact.

Adding to group

To connect a group to the bot:
1. Go to the chat with bot.
2. Click on its name on the top.
3. Click on three dots.
4. Choose "Add to Group".

News publication

News message formats:
- Text
- Image with caption

To send news, the user just sends a message of the news to the bot.

Then, a prompt appears with the following buttons.
- Buttons with titles of connected groups.
  When clicking on such a button, the group becomes selected or unselected.
- "Cancel" button to cancel sending news.
- "Send to all" button to send news to all connected groups.
- "Send" button to send news to the selected groups.

If the user wants to send multi-message news at once, he ignores that prompt and just sends another message of the news. The previous prompt disappears and a new one appears.
